

FS KKR Capital Corp.
Notice to Stockholders on the
Fund's Distribution
July 5, 2022

The Board of Directors of FS KKR Capital Corp. ("**FSK**" or the "**Fund**") (CUSIP Number: 302635206) announced a second quarter dividend of \$0.68 per share to be paid on or about July 5, 2022, to stockholders of record as of June 15, 2022.

The information contained within this notice is an estimate based on the Fund's year-to-date activity and source of distributions. The tax classification of distributions for a tax year (the Fund's fiscal year) is dependent on the Fund's taxable income for the full year. As such, the Fund will confirm the tax classification of distributions after the end of the tax year. Therefore, the Fund may recharacterize its distributions for the tax year due to subsequent events. The Fund reports to stockholders annually the actual tax character of its distributions for U.S. federal income tax purposes on Internal Revenue Service Form 1099-DIV, as appropriate, which is issued after the end of the tax year. The Fund also will include in its fiscal year 2022 SEC Form 10-K information and on the Investor Relations section of the Fund's website the components and tax treatment of all the Fund's distributions for the fiscal year. Each stockholder should consult their tax advisor regarding this distribution notice.

For tax purposes, FSK is a regulated investment company ("RIC"). Distributions received by a stockholder during 2022 are designated in accordance with Subchapter M of the Internal Revenue Code of 1986, as amended ("IRC"), as set forth below.

Ordinary Income Dividends: These distributions are from FSK's ordinary net investment income and short-term capital gains (if any). This type of distribution is reported on a stockholder's tax return as ordinary income. Ordinary income distributions from a RIC do not qualify for the current maximum U.S. individual income tax 20% tax rate on dividend income from domestic corporations except to the extent the RIC received the income in the form of qualifying dividends from domestic corporations.

To the extent FSK receives qualifying dividends from corporations, the portion of the FSK dividends that qualify for the U.S. individual qualified dividend income tax rate (currently maximum 20%) are included in the table below. For a stockholder who acquired or disposed of FSK shares during 2022, qualified dividends reported may not be eligible for the qualified dividend income tax rate.

Capital Gain Distributions: Capital gain distributions (if any) arise from net long-term capital gains recognized by FSK during the year. Due to capital loss carryforwards, FSK does not expect to report capital gain distributions during 2022. If FSK were to generate capital gains for distribution, this portion of distribution generally would qualify for exemption from U.S. withholding tax under Treas. Reg. §1.1441-3(c)(2).

Interest-related Dividends: FSK generated qualified interest income ("QII" under IRC section 871(k)) that may be exempt from U.S. withholding tax when distributed to non-U.S. stockholders.

Excess Net Interest Income: FSK generated excess net interest income under IRC section 163(j) that may be applicable for U.S. recipients of the Fund's dividends.

Qualified Business Income: To the extent FSK received dividends from REITs, that portion of FSK's dividend earned from REITs is qualified business income under IRC section 199A that may afford a lower effective tax rate on this portion of the Fund's distributions.

Distributions reinvested through FSK's Dividend Reinvestment Plan ("DRP") are treated, for U.S. federal income tax purposes, as if the distributions were received and taxed as if received in cash.

DETAILS OF DISTRIBUTION PAID ON OR ABOUT July 5, 2022

The amounts shown in the tables below represent the estimated accounting of FSK's 2022 distribution(s). The final amounts for the components of the distribution(s) are subject to change and will be made for year-end tax reporting.

- FSK designates these dividends as amounts eligible for treatment as qualified dividend income ("QDI") in accordance with IRC section 854(b) as well as eligible for the dividends received deduction available to certain U.S. domestic corporations. As such, for individuals subject to U.S. federal income tax, the QDI amounts are taxed at qualified dividend income tax rate (currently maximum 20%). The QDI determination will be made for year-end tax reporting.
- FSK designates the above per share amounts of the total dividends by payment date as "interest-related dividends" within the meaning of IRC section 871(k). The final interest related dividends determination will be made for year-end tax reporting.
- FSK designates the above percentages of each of the total dividends by payment date as "excess net interest income" within the meaning of IRC section 163(j). The final excess net interest income amounts will be made for year-end tax reporting.
- FSK designates the above per share amount of the total dividends by payment date as "qualified business income" within the meaning of IRC section 199A. The final qualified business income amounts will be made for year-end tax reporting.
